# Quashnet River Stroll

## Saturday, June 17<sup>th</sup> from 9:00am to 11:00am

Stroll along the sides of a restored trout stream. Learn the story of the Quashnet River – from a river with abundant brook trout, to a mid-19th century dammed river for water power, to a river for cranberry cultivation. Today the river is an important migratory fish run for alewife and salter brook trout, home to herring and eels, and is Waquoit Bay's largest source of fresh water.

A moderate walk with some hilly terrain; 3 miles, about 2 hours. The return trip takes us on a narrower trail along the other side of the river. Park at dirt lot on Martin Road, off Rt. 28 in Falmouth and meet at the kiosk. For adults. No parking fee. Call (508) 457-0495 x125 for more info. This program is part of the DCR's Southeast Massachusetts Adult Walking Club.
